- Nov. 21 **New!** Ask an Expert Office Hours (deKoven House) (*Middletown*)

December 2016

- Dec.7 Regional Summit – Southeast (Co-hosted by Avalonia Land Conservancy and N. Stonington Citizens Land Alliance) (*N. Stonington*)

Course Summaries

For further details visit www.ctconservation.org or contact Amy at abpaterson@ctconservation.org

CLCC Model Conservation Easement Seminar – Nuts & Bolts, Doing Deals & Hot Topics

Join us at the beautiful Great Hollow Nature Preserve for a comprehensive seminar on conservation easement transactions, with the morning focused on the basics; the afternoon on more advanced “hot” topics; and, in between over lunch, an opportunity to network, exchange news, and run your questions by our experts and your peers about conservation deals in your neck of the woods. **Join us for all or any part of the day.** (10:00am – 2:30pm with lunch included)

Regional Smartphone GPS Training Series - In partnership with the UCONN CLEAR

Offered in multiple regions and taught by the faculty from the UConn CLEAR Geospatial Training Program, this one-day introductory training will cover the basics of using an iOS or Android phone or tablet to collect field GPS data for improved conservation easement monitoring and enforcement. Course participants will be taught how to collect field data using personal mobile devices and upload GPS data to interactive online maps that can be saved, shared and embedded on land trust websites. (9:30am – 4:00pm with lunch included)

2016 Regional Land Trust Summit Series - Networking – Socializing – Information Sharing

Offered in multiple regions and facilitated by CLCC executive director Amy B. Paterson, our popular series of fun and informal roundtables, providing peer-to-peer networking for land trust board members, staff and other volunteers working to conserve land in the same region. (7:00 – 8:30pm)

Exploring the Spectrum of Alternative Land Trust Management Models

Offered in multiple regions and facilitated by Sharon Danosky, we'll focus our discussion on different models that bring more human resources to bear on increasing demands for small land trusts. Land trusts sharing a staff position, a shared services coalition, a collaborative multi-town project, a potential merger and other models will be examined. With an emphasis on break-out exercises and group discussions you will leave the discussion better informed of alternative management models and ready to share ideas and next steps to pursue with your land trust board and neighboring land trusts. (6:30 – 8:30pm)

Focus Group: The Green Geek Squad

If you like sharing how you are using technology in your conservation work (or, are just interested in learning from those that are tech savvy), you'll want to join CLCC's 2016 Summer Focus Group - the Green Geek Squad. The purpose of the CLCC Focus Group Series is to provide peer-to-peer networking among individuals serving in similar functions who might not otherwise have the opportunity to meet, and facilitate sharing and brainstorming; and gain a better understanding of how Connecticut's land trusts are approaching aspects of land trust work – in this case using technology to fulfill their mission and do really cool stuff. This year's focus group is open to board, staff, volunteers, and consultants who can't get enough of their devices and gadgets employed in the name of conservation. (10:00am -2:00pm – lunch included)

Webinar: Building the Board that Understands and Assures Perpetuity

Learning how to become a stronger, more purposeful board will help your board members become more excited about their participation in the land trust and more effective in the work that matters now and for the future of the land trust. As a BoardSource Certified Governance Trainer, Sharon will lead an interactive session that focuses on self-reflection that can set you and your board on a path to a more constructive partnership.

Ask an Expert - Office Hours

Offered in two locations, these 1:1 sessions will provide you with the opportunity to meet in a confidential setting with conservation professionals for up to one hour to discuss conservation related questions, concerns, and techniques to help you advance your conservation goals. Professionals will include an attorney, accountant, and land manager. More details coming soon.
