

1. Foster emotional connections between individuals and our environment in the hope of developing a holistic sense of kaitiakitanga all in the face of climate

2. veterinarian to assist in mitigating the biodiversity crisis - to see our islands and surrounding ocean return to their once wild status.

With your food basket and my food basket the people will thrive

WHAT CAUSES MY GREEN ANGST:

9

CLIMATE CHANGE IS HERE... RIGHT NOW.

THE STATISTICS :

Climate Change in the American Mind: Beliefs & Attitudes, December 2022 – Yale Program on Climate Change Communication

- Americans who think climate change is happening outnumber those who don't by a ratio of more than 4:1
- 1 in 10 Americans have considered moving to avoid the impacts of climate change
- 1 in 10 Americans report experiencing symptoms of anxiety due to climate change within the past two weeks and resultant symptoms of depression
- 1 in 4 Americans say they try not to think about Climate Change
- 61% of Americans disagree that it is too late to do anything

10

HOW IS CLIMATE CHANGE IMPACTING OUR PLANET?

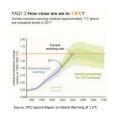

#### THE TIMELINE OF DAMAGE...

- 0.75 degree rise by the end of the 20th century
- By the end of the 21st century, we can expect a rise anywhere between 1.1 degrees and 6.4 degrees
- 2019 = surpassed 1.1 degrees warmest it has been in 11,000 years
- Has taken 240 years to get to 0.75 degrees above pre-industrial levels
- In the past 19 years it risen another 0.35 degrees!!!

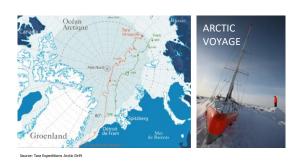

16

### 1.5 DEGREES BELOW PREINDUSTRIAL LEVEL THRESHOLD - WHAT DOES IT MEAN?

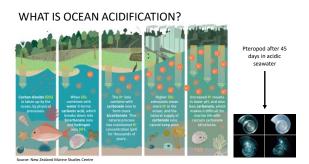

17 18

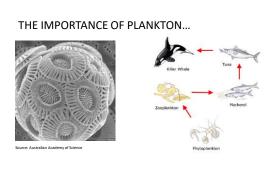

### THE EFFECT OF A WARMING OCEAN...

21 22

23 24

## LEARNINGS...

- The extent of coral bleaching reached 30% to 50% at some islands of the Tuamotu Archipelago in Polynesia
- As much as 90% of Samoan corals were dead
- Some of the reefs of Tuvalu and Kiribati were completely wiped out
- Decrease in ocean pH by 26% since the start of the industrial revolution
- Siberian volcanoes 252 million years ago caused an ocean acidification event = greatest ever mass extinction of life on the planet
- Ocean can cope with a drop of pH of 0.1 however if it continues on its current path to 0.7 prepare for similar results

27 2

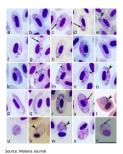

29 30

A TEMPORARY FIX...

39

40

### WHAT'S HOLDING US BACK??

- Global inequality by addressing climate change we are forced to tackle poverty
- Long term problem death of political campaigns
- Lack of global leadership at all levels
- Today = 1% of world GDP, by the end of the 21  $^{\rm st}$  century = 20% of world GDP

41 42

WHAT CAUSES MY GREEN ANGST:

THE SIXTH MASS EXTINCTION IS UPON US...

#### THE FACTS...

- As many as 1 million species are at risk of extinction in coming decades.
- 6<sup>th</sup> mass extinction on planet but 1<sup>st</sup> caused by humans.
- The number of vertebrates that have gone extinct over the last 100 years should have taken 800 10,000 years
- Not a single taxa is not at risk of extinction
- Amphibians are in the most trouble, with over 40% of species threatened
- Many extinctions in the ocean are going unseen

EXAMPLES ON THE MAINLAND?

77 78

HOW DOES ALL THIS APPLY TO YOU?

## THE IMPORTANCE OF LAND TRUSTS...

- Advocacy
- Demand change at the local / state / national
- Prioritization of carbon sequestration
- Wildlife protection
- Recreational access
- Protection from exploitation
